Liquid glass, **system-quiet.**

Pricely's surfaces are stacked: blur + tint, top highlight, hairline rim, optional press shadow. Five files, zero dependencies beyond React + a webfont. Hand this prototype to Cursor as the source of truth.

Five files: `pw-tokens.jsx` · `pw-glass.jsx` · `pw-nav.jsx` · `pw-screens.jsx` · `pw-app.jsx` . Drop into Cursor with the entry HTML and you have the full system, no build step. Tokens are flat objects, glass is a single component, screens compose them.
